

SONIX

Sonix has traveled extensively around the globe at an aspiring young age. Born in China, raised in Canada, now residing in the United States and having lived in numerous countries along the way, Peter Liu, known simply as DJ Sonix to his fans, is dubbed as the international rolling stone. Such worldly lifestyle has chiseled him into quite an original innovator. Distancing himself from the norm, Sonix has been the leading pioneer in what he plays and how he plays. His artistry shines from his worldly experience and innovative nature.

In a decade's time, Sonix has developed a well sense of how the Electronic Dance Music scene grows. While many are passive consumers in the scene, some help shape it. Sonix is the latter. Releasing dozens of mixed CDs every year and having a decade of DJing experience, Sonix understands the needs of a DJ and for a DJ. His DJ mixes have become benchmarks for many to look up to in the DJ mix pool, inspiring new and old DJs alike. Similarly, Sonix is influential in the production front as well with his groundbreaking

move of reworking Armin van Buuren's "Burned with Desire" when it first came out into a DJ friendly Intro Mix, which sparked a wave of young producers following in his footsteps with a sea of Intro Mixes. Since then, it is not uncommon to hear DJs play the Intro version of a record to start off their sets. His intuitive ingenuity of taking ordinary conventional methods and turning them into influential movements is what makes Sonix extraordinary.

Hailing from Canada, this Los Angeles resident has earned a respectful reputation of elevating the dance floor with his signature marathons since the '90s. What sets Sonix apart from the rest of the pack is his unique style of orchestrating a full spectrum of Electronic Dance Music into one seamlessly progressing motion. Using a vast array of DJing arsenals from house to progressive to

breaks to trance to techno and so forth, Sonix is able to layer elements from all genres and send the audience into an emotional frenzy, while transcending the dance floor to a skillfully crafted musical realm that taunts the audience to crave for more.

From his breathtaking larger-than-life performance to his modest down-to-earth personality, this international man of mystery has mystified many with this on and off stage contradiction. Fans from around the world have praised Sonix for his mesmerizing sets, prophesying him the next Sasha and Tiesto combined. His music has influenced and touched countless others in their own professions, not just DJing. Having been featured on a Hawaii entertainment magazine thanks to a top chef in Hawaii, Sonix has been graced with his share of the limelight in the public eye. Furthermore, fans have raved religiously about Sonix overseas and in North America that they have landed him gigs in Asia and Mexico, while numerous offers pour in from Europe, Australia, and North America. With an increasing demand for Sonix worldwide, it is no surprise to see an ever growing busy schedule touring the world, while still finding the time to finish his artist album.

To date, Sonix has performed in North America and Asia at clubs, raves, and festivals, in addition to global radio stations in Europe and Australia. With his radiant persona and ability to draw masses and keep them on their toes, Sonix is definitely not to be missed; and his music is quintessential to every Electronic listener's musical journey. Expect top-notch choons and mixes from this crowd-pleasing future giant in the years to come.
